

dataLog®

The dataLog product family manages nightworkers and provides a tool to measure performance of cleaners and security officers on patrol. Checkpoints located in the areas to be validated are read with a durable handheld data collector. Using a mobile phone and wireless Bluetooth communication, real time information on the person's activities and whereabouts can be provided on demand. PC based management solutions with clear and concise reporting provide a complete package.

Lite Patrol

Lite Patrol for Windows is a basic tool for management and verification of security patrols. Lite Patrol allows you to easily about performed services to customers and their sites.

- **Patrols**
- **Checks of technical equipment and installations**
- **Proof of unscheduled checks**

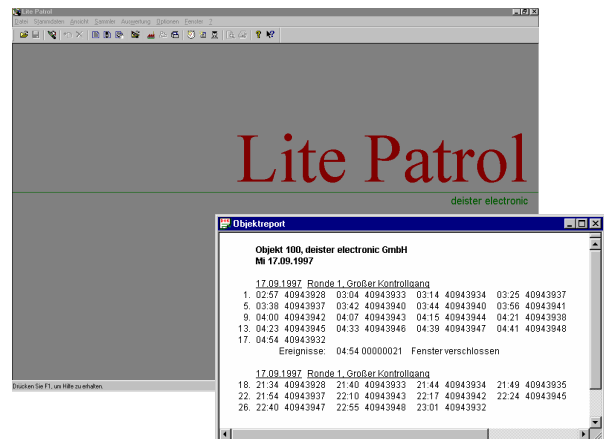

Ideal for in-house security operations and facility management departments, this easy-to-use evaluation system is uses Windows and provides a variety of fully detailed historic reports on any application which requires positive proof of a time date stamp.

Configuration of Master Data

The following master data with various parameters and information fields are stored in the database:

- **Location data**
- **Checkpoints**
- **Patrols**
- **Events**

Lite Patrol – the Software Package

Evaluation of Collector Data

The data which are downloaded from the data collectors can be summarised in various comprehensive reports:

- **Location report** (everything you want to report to the customer)
- **Inspection report** (everything you need to know about your guard tours)
- **Exception report** (every deviation from the plan)

Remote Data Transmission

Lite Patrol for Windows can configure the data transfer units (de Trans, WK Trans) for remote data transmission.

Working with a LAN

The database can be stored on a LAN device and be accessed from various workplaces. Two password levels secure the access to the master data.
