

# proxSafe®

Where is the digital camera? Who has been using the company car? When was the technician in the building? proxSafe is the intelligent management system for keys and valuables which provides answers to your daily 'key questions'. Contactless RFID keytag technology provides reassuring reliability. The proxSafe family is modular, expandable and network ready.

## panel DD16

proxSafe DD-keyPanels are the perfect solution when it comes to compact storing of many keys or items under tight space conditions. The panels which are available in three different slot densities are compatible with various proxSafe product lines.

Every slot contains a contactless RFID-Reader which enables it to automatically identify every keyTag which is inserted into a proxycylinder. An illuminated ring around the keyhole guides the user to the selected keyTag or valuable.

Due to RFID-Technology, the identification is extremely reliable and totally maintenance free even after many years of use.

The panel concept allows any size of system from 8 to thousands of slots with numerous configurations and housings. It is possible to start with a partially equipped proxSafe housing and add new panels later, if more slots are needed.

## Your benefits at a glance:

- **Contactless** – no corrosion, no wear
- **Maintenance Free** operation
- **Reliable Identification** even after years of use
- **Available in 3 Slot Densities**
- **Modular 19" Concept** fits any need
- **Illuminated Ring** for perfect user guidance
- **High Slot Density** for maximum use of storage space
