Dear Managing Director,

LETTER OF REFERENCE

proxSafe key management system

This is to confirm that our school is one of the happy users of the proxsafe key management system supplied by Coselec Pte Ltd.

It was after much sourcing and careful evaluation of several other key management systems that our school decided to invest into this German made proxSafe system. The proxSafe system was chosen as it fully met our school's key requirements especially "quality and reliability" as well as compliant with the **MOE's Schools Standard ICT Operating Environment (SSOE2) standards**.

The proxSafe system is installed at the General Office and manages 128 keys belonging to several areas ranging from the principal's room, special rooms, science laboratories, computer laboratory, auditoriums and PE room. We also installed another system and manage 64 keys belonging to all the class rooms for our students to book in/out.

The proxSafe key management system is very simple to use, fully automatic, highly innovative and totally eliminates the cumbersome manual process of record-keeping and administration. The system provides an audit trail of each and every key. This has encouraged ownership of keys which translates to very prompt return of keys and almost zero incidence of lost keys.

The staff who installed the system for us exercised good professional skill and knowledge. As and when we encounter technical difficulty, they have render the time to follow up and rectify the problem in the upmost. This is especially so for Mr Patrick Teo – the project Engineer, the work always come first.

We will not hesitate to recommend this proxSafe system to any interested schools. Thank you

Yours faithfully

Eric Quek
Operation Manager
