

22 July 2019

Dear Patrick,

We are pleased to endorse our satisfaction on proxSafe Key Management System. With proxSafe, auto auditing of keys and ownership of keys have been greatly enhanced. Operational cost and manpower resources have been reduced since implementing the system as the manual issue and return of keys was eradicated. The whole system has worked reliably since it was installed and has provided us with continuous 24/7 smooth and efficient key access control.

The hardware is maintenance free and very durable, we have been using the system for more than 3 years and it is still functioning very well. In-depth reports indicating all user activities are useful during security audit, no worries of missing records or recording mistakes due to human error.

The professional service rendered by Coselec Pte Ltd has met our expectations. They have been providing a good customer service support and a fast reliable backup whenever required.

We are pleased with the performance and the services provided by Coselec Pte Ltd and have no hesitation to recommend the system to other interested parties.

Yours faithfully,

Marilyn Ng  
Technical Officer
